DETAILED ACTION

Priority

1. Receipt is acknowledged of papers received in this national stage application from the International Bureau (PCT Rule 17.2(a)), submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Objections

3. Claims 6-8 are objected to because of the following informalities: claims 6-8 are in improper form because claim 6 employs capitalization for each component and may be construed as a new claim or an incomplete claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1712

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kishimoto, US 4,272,616. Kishimoto discloses can claims compositions of nonionic surfactants reading on those claimed in combination with alkali metal thiocyanates. Kishimoto (claim 7) discloses a ratio of surfactant to thiocyanate of 1:0.1 to 1:5.0. Said range overlaps the range of claim 1.

The compositions of Kishimoto are above the critical micelle concentration and would form the liquid crystalline phases of claims 2 and 3 inherently since the compounds read on those instantly claimed.

To the extent the Kishimoto reference differs from the compositions in the exemplified combination, it would have been obvious to one of ordinary skilled in the art at the time of applicants' invention to vary the concentrations and the materials within the teachings of the Kishimoto reference for their use in photography as a radiation sensitive antistatic layer material.

Allowable Subject Matter

7. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 6-8 are allowed.

Art Unit: 1712

9. The following is a statement of reasons for the indication of allowable subject matter: the claimed combinations employing a structured surfactant as claimed are not disclosed nor fairly suggested in the prior art.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
